Project Title: Issuance of Hazardous Waste Facility Permit for Bakersfield Transfer, Inc.

State Clearinghouse No.:

Project Location: 1620 East Brundage Lane, Bakersfield, CA 93307

County: Kern

Project Description:

The project consists of making a permit decision on a Standardized Permit application submitted by Bakersfield Transfer Inc. to the Department of Toxic Substances Control for the storage and transfer of hazardous waste in tanks and containers. The permit, if approved, would allow BTI to construct and operate a hazardous waste storage and transfer facility. BTI would be allowed to store 80,000 gallons of liquid hazardous waste in tanks, 1558.4 tons of liquid hazardous waste in containers, and 400 tons of solid hazardous waste. Hazardous waste managed by BTI includes used oil, waste antifreeze, oily water, contaminated petroleum sludge, and solids contaminated with oil. The permit would also allow BTI to transfer hazardous waste between containers and tanker trucks or between tanker trucks to tanker trucks in the loading/unloading area.

Finding Of Significant Effect On Environment: *(An Initial Study supporting this finding is attached.)*

The impacts on individual resources were examined in the attached Initial Study. DTSC concluded that there would be no impacts to the following resources: Aesthetics, Agricultural Resources, Biological Resources, Cultural resources, Geology and Soils, Hydrology and Water Quality, Land Use and Planning, Mineral Resources, Noise, Population and Housing, Public Services, Recreation, Transportation and Traffic and Utilities and Service Systems.

Impacts to the following resources were found to be less than significant: Air Quality and Hazards and Hazardous Materials.

Mitigation Measures: None required.
